PROFILE SUMMARY

Junior Software Engineering and Application Support candidate with hands-on experience developing, testing, deploying and troubleshooting business web applications. Experienced in React, TypeScript, Supabase, PHP, MySQL, Dynamics 365 and Power Automate. Built role-based management systems, automated business workflows and supported database-connected applications. Strong in technical troubleshooting, documentation and converting operational requirements into practical system improvements.

CAREER HIGHLIGHTS

- Developed and deployed a district-level management system using React, TypeScript and Supabase with five role-based user levels.
- Built an agentless network-monitoring prototype using Flask, React, PostgreSQL and Python-based network scanning.
- Supported Dynamics 365 Field Service and Power Automate workflows for renewal-record processing and automated reminders.
- Gained hands-on experience deploying and maintaining applications through Vercel, Render, Azure App Service, GitHub and cPanel.

WORK EXPERIENCE

Bintara Solutions Sdn Bhd | Jan 2026 – July 2026

Software Engineering & IT Support Intern

- Developed and improved business web applications using React, TypeScript, Bootstrap, PHP, MySQL and Supabase.
- Built dashboard, user, member, group, activity, reporting and audit-log modules.
- Implemented authentication, approval workflows and role-based access control for five user roles.
- Troubleshoot Dynamics 365 and Power Automate issues involving Excel, Dataverse and renewal workflows.
- Tested application modules, verified database records and documented technical issues and fixes.
- Supported WordPress maintenance, SEO improvements and application deployment across multiple cloud platforms.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Python, PHP, SQL, Java, HTML, CSS

Frontend: React, Vite, Bootstrap 5, Responsive Web Design

Backend & API: Flask, PHP, REST API, Authentication, Role-Based Access Control

Database: Supabase PostgreSQL, MySQL, Dataverse, phpMyAdmin

Automation & Business system: Power Automate, Dynamics 365 Field Service, SharePoint, Excel

Testing & Support: Functional Testing, Manual Testing, Database Validation, Debugging, Documentation

Deployment & Tools: Git, GitHub, Vercel, Render, Azure App Service, cPanel, VS Code

Analytics & CMS: WordPress, Google Analytics 4, SEMrush

PROJECTS

ePengakap Daerah — District Scout Management System

Tech: React, Vite, TypeScript, Bootstrap, Supabase

- Developed a district-based management system covering users, groups, members, activities, reporting, settings and audit logs.
- Implemented role-based access control for five user levels with district and group-level data isolation.
- Integrated Supabase authentication, approval workflows, database validation and soft-delete functionality.
- Added member import, search, pagination, formatting validation and CSV/PDF reporting features.
- Deployed the frontend through Vercel and managed application data using Supabase PostgreSQL.

NetWatch — Agentless Network Monitoring Dashboard

Tech: React, Flask, PostgreSQL, Python, JWT

- Developed a network-monitoring prototype for device discovery, asset inventory, scan history, security alerts and risk indicators.
- Integrated a React dashboard with Flask REST APIs and PostgreSQL.
- Built a local Python scanner that retrieves scan commands, detects devices and uploads results to the backend.
- Implemented JWT authentication, API-key protection and role-based access for administrators, operators and viewers.
- Added device classification, scan-status tracking, topology information and reporting capabilities.

Dynamics 365 / Power Automate Renewal Workflow

Tech: Power Automate, Dynamics 365 Field Service, Dataverse, Excel

- Supported the development and troubleshooting of a renewal-tracking workflow using Excel, Dataverse and Power Automate.
- Investigated lookup, GUID mapping, required-field, date-conversion and duplicate-record issues.
- Helped design automated 90-, 60- and 30-day renewal reminders for the sales team.
- Documented workflow errors, testing evidence and recommended fixes.

Inventa — Student Management System

Tech: PHP, MySQL, Azure App Service, cPanel

- Investigated login, session, routing and database-connection issues in a PHP and MySQL application.
- Supported deployment through Azure App Service and an external MySQL database.
- Resolved SSL/HTTPS, redirect and profile-related system issues.
- Retrieved and migrated project files from cPanel into the company GitHub repository.

WordPress Website & SEO Improvement

Tech: WordPress, Basic On-Page SEO, Google Analytics, SEMrush

- Maintained website content, page layouts and responsive presentation.
- Improved basic on-page SEO, including titles, meta descriptions, headings and internal links.
- Used Google Analytics and SEMrush to review traffic, visibility and website performance.

EDUCATION

Diploma in Digital Information

Politeknik Sultan Mizan Zainal Abidin | 2023 – 2026

CGPA: 3.94

Relevant Coursework: Programming, Database Systems, Networking, Web and Mobile Development, System Analysis & Design

LANGUAGE

Malay — Fluent | **Thai** — Fluent | **English** — Intermediate | **Mandarin** — Basic
